

Release Spreader Bar for Catamaran and Dinghies

Releasable under tension

Thanks to its lever, the spreader bar can be easily released without any effort and can be operated by a sailor of any age or skill level (i.e. novice, youth, female...).

In the closed position, the lever enables an easy release, even under tension

In the open position, the hook can be easily re-engaged and remains attached to the spreader bar

Easy re-engaged

Once opened, the hook of the spreader bar can be easily re-engaged and used again. The Wichard spreader bar has been specifically designed, so that it can be easily and single-handedly operated without any effort and in any kind of conditions.

Attached hook

Even when opened the trapeze hook always remains attached to the spreader bar. The sailor can not lose the hook accidentally, when released, and no lines are required to retain it.

Co-developed with the French National Sailing School.

- > Releasable under tension by a sailor of any age or skill level
- > Easy re-engaged: single-handed operation
- > Permanently retained hook
